MG

“ *I remember Gina from our school days and remember that she always had the well being of others in her heart. She scolded me once for saying something bad about another student when we were in 5th or 6th grade. That scolding has stuck in my memory all these years and I've tried to always take it to heart and live by it. No doubt she has touched many, many lives and brightened lots of days for those she met. May you rest peacefully on the other side and may God comfort your family and friends.*
